

STRATEGIC PARTNERSHIP PROPOSAL

Prepared by: Pulse AI | For: Nexora Capital | Confidential

Date: April 14, 2026 | Reference: NXC-2026-04-PULSE

1. Executive Summary

Pulse AI proposes a strategic partnership with Nexora Capital to deploy an AI-powered executive productivity suite across Nexora's 12-firm portfolio. The system provides autonomous inbox triage, calendar conflict resolution, and commitment tracking, running entirely on Nosana's decentralised GPU network.

Proposed deal terms: EUR 480,000 annual licence (40 seats). Pilot: 5 seats, 60 days, no charge. Full deployment target: July 1, 2026.

2. Problem Statement

Portfolio executives spend an average of 3.2 hours per day on email triage and scheduling time that could be redirected to capital allocation decisions.

Missed follow-ups and double-booked meetings cost an estimated EUR 1.2M per year in rescheduling overhead and lost deal velocity across the portfolio.

3. Proposed Solution

Pulse deploys as an ElizaOS plugin running on-premise within each firm's cloud environment. LLM inference runs on Nosana GPU nodes - no data leaves the client environment to third-party AI providers. Key capabilities:

- Email classification and draft generation (action-required / follow-up / noise)
- Calendar conflict detection with one-click resolution
- Commitment tracking: surfaces broken promises before they become problems
- Morning briefing: spoken or written daily digest of priorities

4. Commercial Terms

Licence Model: SaaS annual subscription, per-seat pricing
Pilot (5 seats): Complimentary - 60 days from contract signature
Full licence: EUR 12,000 per seat per year (min. 10 seats)
Portfolio discount: 15% for 12+ firms signing simultaneously
Payment: Annual upfront, invoice on go-live date
SLA: 99.5% uptime, 4-hour incident response

5. Implementation Timeline

Week 1-2 (April 14-25): Legal review and contract signature
Week 3-4 (April 28-May 9): OAuth credential setup and data access config
Week 5-6 (May 12-23): Pilot deployment at Nexora Capital HQ (5 seats)
Week 7-8 (May 26-June 6): Pilot evaluation, feedback collection
Week 9-10 (June 9-20): Portfolio-wide rollout planning
Week 11-12 (June 23-July 1): Full deployment - 40 seats across 4 firms

6. Key Contacts & Approvals Required

Nexora Capital - Decision makers who must sign off:

- Marcus Veld (Managing Partner) - commercial approval above EUR 200k
- Sophie Hartmann (CTO) - technical due diligence sign-off
- Legal team (attn. Daniel Roos) - data processing agreement (DPA)

Pulse AI - Contacts:

- Partnerships: partnerships@pulse-ai.com
- Technical: engineering@pulse-ai.com
- Legal: legal@pulse-ai.com

7. Open Action Items

The following items are BLOCKING the April 25 contract deadline:

- [URGENT] Marcus Veld to approve budget allocation by April 18.
- [URGENT] Sophie Hartmann to complete security questionnaire by April 21.
- [REQUIRED] Daniel Roos to review DPA draft - sent April 10, awaiting response.
- [REQUIRED] Nexora IT to whitelist Nosana GPU egress IPs by April 23.
- [NICE-TO-HAVE] Introductory call with 3 portfolio CTOs before pilot starts.

8. Risk Register

RISK-01 (High): Legal review delay pushes pilot start past May 12.

Mitigation: Parallel-track DPA and commercial terms review.

RISK-02 (Medium): Nosana GPU network latency >2s during peak hours.

Mitigation: Reserved node tier available at +EUR 800/month premium.

RISK-03 (Medium): Google Workspace admin access delayed at portfolio firms.

Mitigation: Pulse supports OAuth delegation - no IT admin required.

RISK-04 (Low): Pilot users revert to manual email after training period.

Mitigation: Dedicated onboarding session + 30-day check-in call.

9. Next Steps

1. Nexora to send signed Letter of Intent by April 18.
2. Pulse to deliver final SLA and DPA documents by April 16.
3. Joint kick-off call: April 22 at 10:00 AM CET (invite sent separately).
4. Contract signature meeting: April 25, Nexora Capital HQ, Amsterdam.
